

N.I.Vavilov and his Institute

A history of world collection of plant genetic resources in Russia
by Igor G. Loskutov (Vavilov - Frankel Fellow - 1993)
1999, 188 pages. 17x24 Softcover. ISBN 92-9043-412-0

The Vavilov-Frankel Fellowships programme was established by the IPGRI Board of Trustees to commemorate the unique contributors to plant science by Academician Nikolai Ivanovich Vavilov and Sir Otto Frankel. This research aims to describe the historical scientific background of N.I.Vavilov's life and the brief history of the Institute of Plant Industry. It shows tasks, activities and explorations of the Institute of plant genetic resources till our days.

Contents

Acknowledgements

Chapter 1. Initiation of collecting and studying plant genetic resources in Russia from 1894-1920.

1. Establishment and activities of the Bureau of Applied Botany before 1905.
2. The structure and reorganization of the Bureau in the years 1905-1920.
3. Objectives and tasks of the Bureau, 1905 -1920.

Chapter 2. Brief sketch of N.I.Vavilov's life up to 1920.

1. Education in Moscow.
2. Studies abroad.
3. Activities between 1914 and 1920.

Chapter 3. N. I.Vavilov as Director of the Institute of Plant Industry.

1. N.I.Vavilov's initiatives in the Department of Applied Botany and Plant Breeding.
2. N.I.Vavilov's activities in the All-Union Institute.
3. N.I.Vavilov as a prominent organizer of science in the USSR.
4. N.I.Vavilov and the Institute's internal relationships, 1925-1938.

Chapter 4. Collecting missions and explorations, 1922 - 1940.

- 1.Afghanistan.
- 2.Transcaucasus and Turkey.
- 3.North Africa.
- 4.The Middle East.
- 5.Abyssinea and Eritrea.
- 6.The Mediterranean.
- 7.Spain.
- 8.The Far East.
- 9.The Americas.
- 10.Other travels.

Chapter 5. N.I.Vavilov's theoretical contributions.

- 1.The law of homological series in hereditary variation.
- 2.Centres of origin.
- 3.Disease resistance.
- 4.Taxonomic studies.
- 5.Centres of agriculture.
- 6.Plant breeding .

Chapter 6. Activities associated with plant genetic resources in the 1930s and 1940s.

- 1.T.D.Lysenko's role in the development of agricultural science in the USSR.
- 2.Collision of scientific concepts.
- 3.N.I.Vavilov's arrest, imprisonment and death. Dismissal of the Institute's leading researchers.
- 4.World War II. The siege of Leningrad and the resue of the collections.

Chapter 7. Developments N.I.Vavilov's theories on plant genetic resources.

- 1.New information on centres of origin and diversity.
- 2.The development and organization of VIR's work.
- 3.Phylogeny and genetics.
- 4.Long term conservation.
- 5.Basic research.
- 6.Collecting missions in the 1940s and 1990s.

Chapter 8. Creation of the network of genebanks in COMECON countries.

- 1.Establishment of the Scientific and Technical Council for collections of wild and cultivated plants (STC).
- 2.Establishment of genebanks in COMECON countries.

Afterword - VIR's activities after 1990.

References.

Appendixes

List of mentioned names.

Major N.I.Vavilov's expeditions.

Map of N.I.Vavilov's expeditions.

Major collecting missions accomplished by N.I.Vavilov's associates.

Major species collected by N.I.Vavilov on his expeditions (1916-1940).

VIR's major expeditions within the former USSR in 1986-1990.

Major collecting missions to foreign countries accomplished by VIR's specialists (1954-1994).

Joint collecting missions of COMECON countries (1973-1990).

The list of the International COMECON List of Descriptors.

IPGRI publications are available free of charge to the libraries of genebanks, university departments, research institutes, etc. On request to Head of the Editorial Publications Unit. Titles may also be made available to individuals who can show that they have a need for a personal copy a publication.
